
DIY PROFESSIONAL WOODPLANTS – A WOOD FARM

References Category:Algebraic topology Category:Rearrangement Category:Axioms of topologyQ: Twitter API returning blank page in IE11 I'm using an ASP.NET MVC4 application that is authenticating with Twitter successfully. It works fine in all browsers except Internet Explorer 11. In IE11, all that's returned is a blank page, and nothing shows up in the developer console.

I'm checking to see if the token is being returned correctly, and it is. My code below: `var _applicationToken = new AuthenticationHeaderValue("Bearer", AccessToken); HttpContext.Current.GetOwinContext().Authentication.Challenge(new AuthenticationProperties(), _applicationToken);` I've found people getting blank pages back in IE8, but I'm not sure if that's a solution for me, as I'm on IE11. What else should I be checking? A: Just to leave an answer for posterity, I discovered that in IE11 it's necessary to have the HTTP response use CORS to allow for the authentication to work. In my case, I'm building an Android app so I used a CORS proxy, which I forget to add to my IE configuration. So I added that, and it worked perfectly. Q: Create Image From Existing Image I am trying to develop a simple app where the user can select an image from device storage and then send it to my app as an attachment. I am currently having trouble get the image data from the user selected image. So I have a picture picker and I have the URI of the image. What I need to do is create a new image from the URI that I have. This is what I have so far. `let imageData = try? Data(contentsOf: url as URL) let image = UIImage(data: imageData!)` when I run this I get the following error Cannot convert value of type 'Data' to expected argument type 'Data' A: According to WWDC 2019, Apple has made it really easy to convert NSData to UIImage.
